Portfolio

Quality Assurance specializing in manual software testing with experience in banking and insurance applications. Skilled in functional, exploratory, regression, integration, end-to-end, and User Acceptance Testing (UAT), including requirement analysis, test design, defect management, and validation of complex business workflows. Currently responsible for QA activities within Group Life / Non-Askes at BRI Life. Developing hands-on test automation skills using Playwright and TypeScript through a real workplace project, while maintaining a strong focus on manual testing.

Work Experience

Quality Assurance Analyst **BRI Life** **Feb 2026 - Present**

Under PT Prima Karya Sarana Sejahtera (PKSS)

Group Life / Non-Askes | Jakarta, Indonesia

- Manage manual QA activities across assigned Group Life / Non-Askes initiatives, from requirement discussions and analysis through test design, execution, defect management, and UAT reporting.
- Design and execute functional, exploratory, regression, integration, and end-to-end tests for Kumkara, a core group insurance administration system covering product configuration, underwriting, policy administration, participant management, premiums and billing, claims, and reporting.
- Validate business rules, premium calculations, role-based workflows, approval and transaction statuses, import/export processing, and data consistency across related modules.
- Collaborate with business users, business analysts, developers, and vendors on requirement clarification, SIT/UAT testing, defect investigation, retesting, and regression verification.
- Document test results, supporting evidence, outstanding defects, and release risks to inform release readiness discussions.

Quality Assurance Manual **PT Bank Mandiri (Persero) Tbk** **Jun 2023 - Jan 2026**

Under PT Bumi Amartha Teknologi Mandiri

Livin' by Mandiri - Digital Wealth | Jakarta, Indonesia

- Designed and executed functional, end-to-end, UAT, regression, and backward UAT testing for mobile banking features, validating new functionality and existing business flows across application versions.
- Conducted smoke testing and beta testing in pre-production environments, followed by production testing to validate application readiness and critical business functionality.
- Performed rollback version testing when issues were identified after production deployment and before public app store releases, verifying affected functionality and existing user journeys.
- Validated backend data using SQL queries, inspected API responses through Postman, and analyzed application logs using Elastic Kibana to investigate functional issues and data inconsistencies.
- Monitored test execution progress and managed defect tracking through Jira, documenting test results, defect evidence, reproduction steps, and retesting status.
- Collaborated with developers and cross-functional stakeholders to investigate defects, verify fixes, and communicate testing progress and outstanding issues throughout release cycles.

QA Automation **PT Bionic Teknologi Indonesia** **Apr 2023 - May 2023**
Jakarta, Indonesia

- Executed automated test cases for a web application during a short-term QA engagement and reported functional findings to developers.
- Prepared test execution summaries and defect reports for technical stakeholders.

Customer Service **PT Herbalife Indonesia** **Sep 2020 - Dec 2022**
Jakarta, Indonesia

- Handled member inquiries and coordinated issue resolution with relevant internal teams, including audit.

Education

- **Bachelor's Degree in Computer Science** | Institut Teknologi dan Bisnis Swadharma | 2017 - 2021
  GPA 3.49/4.00

Skills

- **Manual QA:** Functional, Exploratory, Regression, Integration, End-to-End, UAT, Test Scenario & Test Case Design, Requirement Review, Defect Management, Test Reporting
- **Automation (Developing):** Playwright, TypeScript - hands-on learning through a real workplace project
- **API, Data & Logs:** Postman (API validation), SQL/MySQL (data validation), Elastic Kibana (log analysis)
- **Tools & Collaboration:** Jira (execution and defect tracking), GitHub, cross-functional QA coordination
- **Domain Knowledge:** Banking, Digital Wealth, Group Life Insurance, Policy Administration, Premium & Billing, Claims
